

# SafeGuard X-Frame™

Low profile secure tablet solutions

TECHNOLOGY MOUNTING SOLUTIONS

[spacepole.com](http://spacepole.com)

The use of tablets within the retail and hospitality environments is re-writing the ground rules for customer service and increasingly, POS. Their use as an in-store information point is obvious but developers are tapping into the real advantages of using these devices as part of the POS infrastructure.

Other applications abound where tablets can provide information-based solutions. Kiosks provide guided selling, product look up and ordering. In the back office, inventory control, product availability and quality control are key. For the hospitality industry, mobile order taking, processing and kitchen management are important requirements of today's catering environments.

With so many variations on applications and types of device, mounting options are more diverse than ever, requiring flexibility and style whilst ensuring security. X-Frame is the ideal solution for the most compre-

hensive range of Android™, iOS™ and Windows® based tablets. The X-Frame broadens the overall scope of technology mounts for tablets, in effect enabling an ability to service all customer tablet requirements with this highly flexible design. It combines Ergonomic Solutions' traditional retail focus and knowledge with a new aesthetic design to meet the growing demands and use of tablet technology.

Security is important. Tablets are high value and highly sought after. ClickSafe options are available for applications requiring hand-held or mobile operation. Ergonomic Solutions understands technology and technology integration and we also understand the physical security requirements of these valuable assets.

X-Frame is a lightweight, easy to handle, low profile solution that keeps the essential buzz of using a tablet whilst offering a secure mount with a range of options depending upon the requirements of the application.

### Fixed position: Desk top & counter mounting (SPXFx01)

- Secure light weight two piece frame that clamps around the tablet that maintains tablet aesthetics and feel
- 120mm pole
- 98mm footprint
- Internal cable management
- Features DuraTilt® Flip that enables adjustability arc of 270° (from one side to the opposite side)
- Tested through 250,000 cycles
- Simple and timely installation
- Compatible with all X-Frames and fully upgradable for technology changes

- Secure light weight two piece frame that clamps around the tablet that maintains tablet aesthetics and feel
- Portrait to landscape rotation (left and right)
- 120mm pole
- 98mm footprint
- Internal cable management
- Features DuraTilt® Flip that enables adjustability arc of 270° (from one side to the opposite side)
- Tested through 250,000 cycles
- Simple and timely installation
- Compatible with all X-Frames and fully upgradable for technology changes

### Hand-held: Secure yet Removable (SPXFx03)

- Secure light weight two piece frame that clamps around the tablet that maintains tablet aesthetics and feel
- Mounting cradle for fixed use and secure ClickSafe® curly cable tether for hand-held applications
- Free Register & Retrieve™ key management system available
- 120mm pole
- 98mm footprint
- Internal cable management
- 0-70° degree tilt featuring patented DuraTilt® in-built tilting mechanism
- Tested through 250,000 cycles
- Simple and timely installation
- Compatible with all X-Frames and fully upgradable for technology changes

### Quick Release: Mobile enabled and-held (SPXFx04)

- Secure light weight two piece frame that clamps around the tablet that maintains tablet aesthetics and feel
- Features quick release Kensington ClickSafe® lock for fixed or mobile devices
- Free Register & Retrieve™ key management system available
- 120mm pole
- 98mm footprint
- Internal cable management
- Features DuraTilt® Flip that enables adjustability arc of 270° (from one side to the opposite side)
- Tested through 250,000 cycles
- Simple and timely installation
- Compatible with all X-Frames and fully upgradable for technology changes

### Fixed position: Floor mount (SPXf07)

- Secure light weight two piece frame that clamps around the tablet that maintains tablet aesthetics and feel
- Freestanding pole - offers the possibility to bolt down
- 950mm pole
- 450mm base plate
- Internal cable management
- Features DuraTilt® Flip that enables adjustability arc of 270° (from one side to the opposite side)
- Tested through 250,000 cycles
- Simple and timely installation
- Compatible with all X-Frames and fully upgradable for technology changes

The X-Frame promise is to provide a bespoke mount within ten days of the release of a new device. For further information and for a comprehensive list of available X-Frames, please go to [spacepole.com](http://spacepole.com).

# SafeGuard UCS™

With the increasing number of tablets and other mobile technologies being deployed in such diverse sectors as retail, healthcare and education an increased demand for a professional, secure and flexible storage and charging solution has arisen. For Ergonomic Solutions, it is a natural next step to increase our value proposition with the SafeGuard UCS, a storage and charging solution that protects your investment in technology.

The design and function of SafeGuard UCS is targeted primarily at tablet charging and storage with or without protective casings such as SafeGuard X-Frame. In addition, the UCS is also suitable for charging and storing various USB powered devices such as smart phones and mobile payment devices. The SafeGuard UCS is available in three cabinet variants to cover a comprehensive range of use cases, with either charge or charge and sync capability.

For more information and technical specifications, please go to [spacepole.com](http://spacepole.com).

## Ergonomic Solutions

Founded in 1996, Ergonomic Solutions has grown rapidly to become a global leader in the design, manufacture and supply of the most ergonomically advanced mounting and security solutions for a wide range of in-store, and mobile technology for markets including retail, banking, mass transit, and hospitality. Ergonomic Solutions has long been at the forefront of workspace planning and optimisation and our influential Ergonomics Consultancy has advised many of the major European retailers how to create a workspace which optimizes accessibility, usability, safety and comfort for their staff and customers.

Our suite of technology mounting solutions are designed to provide an ergonomic solution across a huge range of applications. From the shop floor to the management suite, we can deliver a solution that ensures that your IT investment makes the best use of the available workspace whilst simultaneously being protected from damage and theft.
